

OUR SEASON ROADMAP

INNOVATION PROJECT

1

RESEARCH

Dive into this season's theme. Read articles, watch videos, gather facts, and understand the real-world context.

2

BRAINSTORM PROBLEMS TO SOLVE

List as many challenges as possible related to the theme, without judging ideas at this stage.

3

VISIT & CONTACT EXPERTS (+PROBLEMS)

Meet or call professionals to validate your problem list, learn new perspectives, and discover hidden issues.

4

GENERATE SOLUTIONS & CHOOSE THE BEST

For each problem, think of possible solutions, then select the one with the biggest potential impact.

5

DEVELOP THE SOLUTION AND PROTOTYPE

Build a small-scale version of your idea to test how it works in real life.

6

SHARE AND ITERATE

Present your prototype to others, collect feedback, and refine it to make it better and more effective.

ROBOT

WAYS TO COMPLETE EACH MISSION

1

Identify different possible approaches for every mission on the game table.

IDEAL ATTACHMENT FOR EACH MISSION

2

Choose or design the best tool to accomplish each mission reliably and individually.

BRAINSTORM STRATEGIES AND SELECT ONE

3

Plan the sequence of missions, considering time, risk, and scoring. Brainstorming different strategies and compare them.

COMBINE ATTACHMENTS

4

Merge the attachments designs to complete multiple missions in each run.

ITERATE, ITERATE, ITERATE

5

Continuously test, fix problems, and improve performance after each robot run.

PRACTICE UNTIL IT'S CONSISTENT

6

Repeat and adapt your chosen strategy until you can complete it successfully most times under match conditions.

WANT THE COMPLETE STEP-BY-STEP PLAN?

Don't stop at avoiding mistakes — build your team, robot, and project like a champion.

👉 The full **FLLPlanner Course** is now available.

Includes expert strategy, templates, and tools used by top-ranked teams worldwide.
